Patent No. 5873853

GENERAL INFORMATION:

APPLICANT: Akihiko TAKASHIWA et al.

TITLE OF INVENTION: ARZHEIMER'S DISEASE, A SCREENING METHOD OF ARZHEIMER'S DISEASE

TITLE OF INVENTION: TAU-PROTEIN KINASE I ORIGINATED FROM HUMAN BEING (AS AMENDED)

NUMBER OF SEQUENCES: 14

CORRESPONDENCE ADDRESS:

ADDRESSEE: WENDEROYH, LIND & PONACK

STREET: 805 Fifteenth Street, N.W., #700
                                                                                                                                                                                                                                                                                                                                                                                                 1373 GACAACCAATATTTCCAGGGGATAGTGGTGGATCAGTTGGTAGAAATAATCAAGGTCC 1432

This clone sequence is one of 5,000 Ceres full-length cDNAs made available to TIGR and Genbank. The following quality assessment of this set was done by comparison with known proteins: two percent of the clones are estimated to be 5-truncated; less than one percent are 3-truncated; approximately two percent represent alternative splice variants including unspliced introns and spliced exons; one percent may contain premature stop codons; five percent may have frame shifts in a coding region. A sequence is considered to be 5'-truncated if it lacks the translation initiation start (ATG). A sequence is considered to be 3'-truncated if it lacks the general considered to be 3'-truncated if it lacks the sequence are cerived from the Ws or Lace coctypes and therefore may contain polymorphisms when compared to sequences from COl-0. Genset carried out the library production and sequences from COl-0. Genset carried out the library production and sequenceing of the full-length clones. Ceres, Inc. carried out the clustering of the location/Qualifiers
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   EGNDAVTGHIISTTIGGKNGEPKÖTISYMAERVVGTGSFGIVPQAKCLETGESVAIKK

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Submitted (11-MAR-2002) Ceres, Inc, 3007 Malibu Canyon Road, Malibu, CA 90265, USA
This clone sequence is one of 5,000 Ceres full-length cDNAs made available to TIGR and Genbank. The following quality assessment of the clones are estimated to be 5'-truncated; less than one percent are 3'-truncated; approximately two percent represent alternative splice variants, including unspliced introns and spliced exons; one percent may contain premature stop codons; five percent may have frame shifts in a coding region. A sequence is considered to be 5'-truncated if it lacks the translation initiation start (ATG). A sequence is considered to be 9'-truncated if it lacks the translation initiation start (ATG).

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        8
                                                                                                                                                                                                                                                                                                                                                                                                                                                       The present sequence is a full-length cDNA encoding GMPK-3, a novel soybean protein kinase stress-related polypeptide (PKSRP). The CDNA was identified on the basis of homology to Physcomitrella patens PK-3 (see ACC57962) and PK-10 (see ACC57966) sequence. GmPK-3 is an example of PKSRPB of the invention that are important for modulating a plant's response to environmental stress. Over-expression of PKSRP coding nucleic acids in a plant results in the plant's increased tolerance to environmental stress. Transgenic monocot and dicot plants are provided that show increased tolerance to high salinity, drought and low
                                                                                                                                                                                                                                                                                                                       New protein kinase stress-related polypeptide coding nucleic acid, useful for producing transgenic plants with an increased tolerance to an environmental stress, e.g. high salinity, as compared to a wild type
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                534
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  531
